Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: the reference numerals in page 6 do not match with those in Figure 1. Please check all the Figures to make sure the reference numerals match with those in the specification. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Specification

2. The abstract of the disclosure is objected to because it contains the word "comprises" in line 1. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 7 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Fujiwara.

Regarding claim 7, Fujiwara shows a motor comprising:

- A motor base (Figure 3) including:

Art Unit: 2834

- A base (10);
- A bearing supporter (for 14) protruded vertically from said base for supporting a bearing (14);
- A stator supporter (outer circumferential surface of 10);
- A terminal made of metal plate (12) and disposed around said bearing supporter;
- A metal tip (4) extended outside said motor base;
- A stator (16) mounted to the stator supporter;
- A rotor (17) supported by the bearing which is supported by said bearing supporter; and
- A metal cover (8), of which end (3) is fixed the said metal tip, for covering said rotor.

Regarding claim 8, it is noted that Fujiwara also shows the end of said metal cover (3) being fixed to said metal tip (4) by welding (7).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of

Art Unit: 2834

the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

7. Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Fujiwara in view of Yasuhiro (JP 06-038432).

Regarding claim 9, Fujiwara shows all of the limitations of the claimed invention except for the end of said metal cover being fixed to the metal tip by engaging and deforming thereof.

Yasuhiro shows the end of said metal cover being fixed to the metal tip by engaging and deforming thereof (Figure 3) for the purpose of connecting the grounding terminal.

Since Fujiwara and Yasuhiro are all from the same field of endeavor; the purpose disclosed by one inventor would have been recognized in the pertinent art of the others.

It would have been obvious at the time the invention was made to a person having ordinary skill in the art to fix the end of said metal cover to said metal tip by engaging and deforming thereof as taught by Yasuhiro for the purpose discussed above.
